-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: On page 1, lines 9-12, the appropriate U.S. Patent Nos. should be inserted into the text.

Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,206,058.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims define an apparatus that anticipates the now claimed subject matter. Examiner takes Official Notice that anticipation falls well within the definition and scope of obviousness. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have claims drawn to the now claimed subject matter in view of Examiner's Noted fact. Furthermore,

Art Unit: 3751

Applicant's attention is directed to In re Goodman cited above in support of Examiner's position.

***.Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by

Crossdale et al.

In regard to claims 1, 4, 8 and 9, the Crossdale et al. reference discloses a vent and fluid transfer "assembly" (see Fig. 1) comprising a fluid filled "container" 1 having an "opening" 11, a "fitment" 15 having a "vent opening" 6 and "fluid opening" 7, a "venting check valve" 5, a "receiver attachment" 2, a "tubular member" 4 and "tube" 14, as claimed.

In regard to claims 2, 3 and 7, "valve" 5 can be defined as a "duckbill".

In regard to claim 5, by merely placing container 1 onto attachment 2 creates a first and second position (i.e., off and on).

In regard to claim 6, see "threads" 12.

In regard to claims 10-15, the method as claimed would be inherent during normal use and operation of the device.
